

OCM user roles

Here are the definitions with respect to the four roles found on the OCM website:

Functions	Content manager	Technical manager	Member of an evaluation committee	Consulting member
Create, modify and deactivate user accounts for each individual institution within the organization and assign different access rights		X		
View and print OCMs	X	X	X	X
Create, modify and delete customizations for each individual institution within the organization	X			
Create, modify and delete an institution's OCM for each individual institution within the organization	X			
Add a comment or reply to a comment regarding an OCM under evaluation			X	
Block an OCM for one or more institutions (parent-child organization)		X		
Define content access permissions under the parent-child organization. <i>(Allow the institutions within a parent-child organization to view each other's customized methods)</i>		X		

Note: Roles can be combined, i.e. a user can have several roles.
