# News

- 3 new directions
  - Areas of expertise
  - Physician orders
  - Trade names
- Incorporation of alcohol-based hand solutions for hand hygiene

# 1<sup>st</sup> direction : Areas of expertise

- For over a year now, this section contains the following wording :
  - Consult your respective professional order regarding the right to perform this activity

## Reasons :

1. Variations between institutions and even between care units
2. Rapid changes in recent years
3. Only professional orders can determine the areas of expertise and competence

## Option :

Customize this section according to the rules in effect within your institution.

Personalize this section 

Areas of Expertise Notes

## 2<sup>nd</sup> direction : Physician orders

- As of June 2016, the concept of an order has been withdrawn from all updated or revised OCMs

### Reasons:

1. Variations between institutions
2. Evolving Practice Areas: Many professionals may prescribe different tests and medications

### Change made :

1. Insertion of a text box on regulations at the beginning of the sections "Generalities" and "Procedure"

**Before performing this OCM:** Consult your institution or your professional order to determine if an individual or collective order is required.

### Option :

Customize the "Required equipment" and "Procedure" sections according to the needs of the institution.

# 3<sup>rd</sup> direction : Trade names

- Since September 2016, trade names have been removed from updated or revised OCMs

**Reasons :**

1. We cannot endorse any company
2. Rapid changes in products offered by various companies

**Change made:**

1. Use of generic name

**Options :**

- Integrate the manufacturer's user guide in PDF form in the "TOOLS" section
- Customize the "Required equipment" section
